

COMPLETE CHESS LEARNING LIBRARY

# The Complete Hippopotamus Defense

Central restraint, adaptive breaks, king safety, and practical move-order skill

COURSE BOOK

50 focused chapters - model positions - decision rules - retrieval practice

Designed to change what you notice, calculate, remember, and do at the board.

# How to Use This Course

ONE CHAPTER, FOUR PASSES

1. Read the position without moving pieces. 2. State your plan and the opponent's counterplay. 3. Study the decision rules. 4. Close the book and reconstruct the position from memory.

RETRIEVAL SCHEDULE

Review the chapter the next day, one week later, and after a game that reaches a similar structure. Retrieval is more valuable than rereading.

BOARD ROUTINE

Opponent's threat - forcing moves - loose pieces - worst piece - central break - best reply - choose and stop.

The course book explains each model position. The separate workbook forces recall, prediction, and self-scoring. Use the book first, then attempt the matching workbook page without looking back.

Engine evaluations are intentionally not the lesson. The aim is to store human decision rules that remain useful when the exact move order changes.

## Course Map

| MODULE               | CHAPTERS |
|----------------------|----------|
| HIPPO FOUNDATION     | 5        |
| HIPPO CENTER         | 5        |
| HIPPO CENTRAL BREAKS | 5        |
| HIPPO QUEENSIDE PLAY | 5        |
| HIPPO KING-SIDE PLAY | 5        |
| HIPPO VS F4          | 5        |
| HIPPO KING SAFETY    | 5        |
| HIPPO VS QUEEN PAWNS | 5        |
| HIPPO ADAPTATION     | 5        |
| HIPPO PRACTICAL PLAY | 5        |

# 01. Move-Order Discipline - Stage 1

## HIPPO FOUNDATION

### READ THE POSITION

Black has chosen a flexible fianchetto without yet promising a full Hippo shell.

### PRIMARY PLAN

Finish urgent development, castle, and keep enough flexibility to answer the first serious central or wing commitment.

### OPPONENT'S COUNTERPLAY

White wants to use the space advantage to finish development, choose a wing, and prevent Black's freeing break.

### REFERENCE LINE

1. e4 g6 2. d4 Bg7

### MEMORY RULE

The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

# 01. Decision Framework

## Move-Order Discipline - Stage 1

|                             |                                                                                                                                                             |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Name the target before moving a pawn: ...e5 or ...d5 challenges the center, ...c5 attacks d4, ...f5 suits a closed center, and ...b5 gains queenside space. |
| PIECE JOB                   | The bishops on g7 and b7 pressure the center; the knights on e7 and d7 support breaks instead of occupying attractive squares for appearance.               |
| TACTICAL WARNING            | Do not spend tempi completing decorative ...a6 and ...h6 moves while White has a forcing central break or direct attack.                                    |
| TRADE FILTER                | Avoid exchanges that leave Black cramped; welcome trades that remove White's best space-using piece or open a useful file.                                  |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                                 |
| CLOCK RULE                  | Use quick setup moves only while the position is quiet; stop at pawn contact, checks, captures, or a change in king safety.                                 |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

## 02. Move-Order Discipline - Stage 2

### HIPPO FOUNDATION

#### READ THE POSITION

The central pawns restrain White while both black knights still have flexible routes.

#### PRIMARY PLAN

Finish urgent development, castle, and keep enough flexibility to answer the first serious central or wing commitment.

#### OPPONENT'S COUNTERPLAY

White wants to use the space advantage to finish development, choose a wing, and prevent Black's freeing break.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6

#### MEMORY RULE

The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

## 02. Decision Framework

### Move-Order Discipline - Stage 2

|                             |                                                                                                                                                             |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Name the target before moving a pawn: ...e5 or ...d5 challenges the center, ...c5 attacks d4, ...f5 suits a closed center, and ...b5 gains queenside space. |
| PIECE JOB                   | The bishops on g7 and b7 pressure the center; the knights on e7 and d7 support breaks instead of occupying attractive squares for appearance.               |
| TACTICAL WARNING            | Do not spend tempi completing decorative ...a6 and ...h6 moves while White has a forcing central break or direct attack.                                    |
| TRADE FILTER                | Avoid exchanges that leave Black cramped; welcome trades that remove White's best space-using piece or open a useful file.                                  |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                                 |
| CLOCK RULE                  | Use quick setup moves only while the position is quiet; stop at pawn contact, checks, captures, or a change in king safety.                                 |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

## 03. Move-Order Discipline - Stage 3

### HIPPO FOUNDATION

#### READ THE POSITION

Black is castled before adding slow flank moves, so king safety is not borrowed from the future.

#### PRIMARY PLAN

Finish urgent development, castle, and keep enough flexibility to answer the first serious central or wing commitment.

#### OPPONENT'S COUNTERPLAY

White wants to use the space advantage to finish development, choose a wing, and prevent Black's freeing break.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O

#### MEMORY RULE

The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

## 03. Decision Framework

### Move-Order Discipline - Stage 3

|                             |                                                                                                                                                             |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Name the target before moving a pawn: ...e5 or ...d5 challenges the center, ...c5 attacks d4, ...f5 suits a closed center, and ...b5 gains queenside space. |
| PIECE JOB                   | The bishops on g7 and b7 pressure the center; the knights on e7 and d7 support breaks instead of occupying attractive squares for appearance.               |
| TACTICAL WARNING            | Do not spend tempi completing decorative ...a6 and ...h6 moves while White has a forcing central break or direct attack.                                    |
| TRADE FILTER                | Avoid exchanges that leave Black cramped; welcome trades that remove White's best space-using piece or open a useful file.                                  |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                                 |
| CLOCK RULE                  | Use quick setup moves only while the position is quiet; stop at pawn contact, checks, captures, or a change in king safety.                                 |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

## 04. Move-Order Discipline - Stage 4

### HIPPO FOUNDATION

#### READ THE POSITION

The b7-bishop has joined the pressure on e4 while White still owns more space.

#### PRIMARY PLAN

Finish urgent development, castle, and keep enough flexibility to answer the first serious central or wing commitment.

#### OPPONENT'S COUNTERPLAY

White wants to use the space advantage to finish development, choose a wing, and prevent Black's freeing break.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7

#### MEMORY RULE

The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

## 04. Decision Framework

### Move-Order Discipline - Stage 4

|                             |                                                                                                                                                             |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Name the target before moving a pawn: ...e5 or ...d5 challenges the center, ...c5 attacks d4, ...f5 suits a closed center, and ...b5 gains queenside space. |
| PIECE JOB                   | The bishops on g7 and b7 pressure the center; the knights on e7 and d7 support breaks instead of occupying attractive squares for appearance.               |
| TACTICAL WARNING            | Do not spend tempi completing decorative ...a6 and ...h6 moves while White has a forcing central break or direct attack.                                    |
| TRADE FILTER                | Avoid exchanges that leave Black cramped; welcome trades that remove White's best space-using piece or open a useful file.                                  |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                                 |
| CLOCK RULE                  | Use quick setup moves only while the position is quiet; stop at pawn contact, checks, captures, or a change in king safety.                                 |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

## 05. Move-Order Discipline - Stage 5

### HIPPO FOUNDATION

#### READ THE POSITION

The recognizable Hippo shell is in place, and Black is already due to read White's center instead of adding a decorative waiting move.

#### PRIMARY PLAN

Finish urgent development, castle, and keep enough flexibility to answer the first serious central or wing commitment.

#### OPPONENT'S COUNTERPLAY

White wants to use the space advantage to finish development, choose a wing, and prevent Black's freeing break.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 a6 11. Rad1

#### MEMORY RULE

The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

## 05. Decision Framework

### Move-Order Discipline - Stage 5

|                             |                                                                                                                                                             |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Name the target before moving a pawn: ...e5 or ...d5 challenges the center, ...c5 attacks d4, ...f5 suits a closed center, and ...b5 gains queenside space. |
| PIECE JOB                   | The bishops on g7 and b7 pressure the center; the knights on e7 and d7 support breaks instead of occupying attractive squares for appearance.               |
| TACTICAL WARNING            | Do not spend tempi completing decorative ...a6 and ...h6 moves while White has a forcing central break or direct attack.                                    |
| TRADE FILTER                | Avoid exchanges that leave Black cramped; welcome trades that remove White's best space-using piece or open a useful file.                                  |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                                 |
| CLOCK RULE                  | Use quick setup moves only while the position is quiet; stop at pawn contact, checks, captures, or a change in king safety.                                 |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The formation buys choices. The value of the Hippo is the correct break, not the completed shell.

## 06. Closed Center and Kingside Counterplay - Stage 1

### HIPPO CENTER

#### READ THE POSITION

Both kings are safe and White's center remains broad but fluid.

#### PRIMARY PLAN

Reposition pieces for ...f5, compare attack speeds, and keep the option of queenside counterplay if White overprotects the king.

#### OPPONENT'S COUNTERPLAY

White normally seeks queenside space or a kingside pawn storm depending on castling and piece placement.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O

#### MEMORY RULE

A locked center gives permission for wing play; the supporting pieces decide whether the attack is real.

## 06. Decision Framework

### Closed Center and Kingside Counterplay - Stage 1

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...f5 only after the center is genuinely closed, the king is safe, and the recapture structure opens a file that Black can use. |
| PIECE JOB                   | The e7-knight, g7-bishop, queen, and f-rook must support the break; the d7-knight often guards e5 and f6.                            |
| TACTICAL WARNING            | Before ...f5, calculate exf5, e5, and any opening of the center that would expose Black's king.                                      |
| TRADE FILTER                | Preserve attacking pieces in a closed center; exchange White's key defender when it creates an entry square or a usable file.        |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                          |
| CLOCK RULE                  | Do not calculate a whole pawn storm at once. Verify the next contact and compare each side's forcing moves.                          |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: A locked center gives permission for wing play; the supporting pieces decide whether the attack is real.

## 07. Closed Center and Kingside Counterplay - Stage 2

### HIPPO CENTER

#### READ THE POSITION

Black has completed the long-diagonal battery without creating central contact.

#### PRIMARY PLAN

Reposition pieces for ...f5, compare attack speeds, and keep the option of queenside counterplay if White overprotects the king.

#### OPPONENT'S COUNTERPLAY

White normally seeks queenside space or a kingside pawn storm depending on castling and piece placement.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7

#### MEMORY RULE

A locked center gives permission for wing play; the supporting pieces decide whether the attack is real.

## 07. Decision Framework

### Closed Center and Kingside Counterplay - Stage 2

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...f5 only after the center is genuinely closed, the king is safe, and the recapture structure opens a file that Black can use. |
| PIECE JOB                   | The e7-knight, g7-bishop, queen, and f-rook must support the break; the d7-knight often guards e5 and f6.                            |
| TACTICAL WARNING            | Before ...f5, calculate exf5, e5, and any opening of the center that would expose Black's king.                                      |
| TRADE FILTER                | Preserve attacking pieces in a closed center; exchange White's key defender when it creates an entry square or a usable file.        |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                          |
| CLOCK RULE                  | Do not calculate a whole pawn storm at once. Verify the next contact and compare each side's forcing moves.                          |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: A locked center gives permission for wing play; the supporting pieces decide whether the attack is real.

## 08. Closed Center and Kingside Counterplay - Stage 3

### HIPPO CENTER

#### READ THE POSITION

The shell is ready and White must soon decide whether to close, exchange, or attack on a wing.

#### PRIMARY PLAN

Reposition pieces for ...f5, compare attack speeds, and keep the option of queenside counterplay if White overprotects the king.

#### OPPONENT'S COUNTERPLAY

White normally seeks queenside space or a kingside pawn storm depending on castling and piece placement.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 a6

#### MEMORY RULE

A locked center gives permission for wing play; the supporting pieces decide whether the attack is real.

## 08. Decision Framework

### Closed Center and Kingside Counterplay - Stage 3

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...f5 only after the center is genuinely closed, the king is safe, and the recapture structure opens a file that Black can use. |
| PIECE JOB                   | The e7-knight, g7-bishop, queen, and f-rook must support the break; the d7-knight often guards e5 and f6.                            |
| TACTICAL WARNING            | Before ...f5, calculate exf5, e5, and any opening of the center that would expose Black's king.                                      |
| TRADE FILTER                | Preserve attacking pieces in a closed center; exchange White's key defender when it creates an entry square or a usable file.        |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                          |
| CLOCK RULE                  | Do not calculate a whole pawn storm at once. Verify the next contact and compare each side's forcing moves.                          |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: A locked center gives permission for wing play; the supporting pieces decide whether the attack is real.

## 09. Closed Center and Kingside Counterplay - Stage 4

### HIPPO CENTER

#### READ THE POSITION

White's d5 and Black's ...e5 have locked the center, making wing operations more realistic.

#### PRIMARY PLAN

Reposition pieces for ...f5, compare attack speeds, and keep the option of queenside counterplay if White overprotects the king.

#### OPPONENT'S COUNTERPLAY

White normally seeks queenside space or a kingside pawn storm depending on castling and piece placement.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e5 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 a6 11. d5 e5

#### MEMORY RULE

A locked center gives permission for wing play; the supporting pieces decide whether the attack is real.

## 09. Decision Framework

### Closed Center and Kingside Counterplay - Stage 4

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...f5 only after the center is genuinely closed, the king is safe, and the recapture structure opens a file that Black can use. |

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...f5 only after the center is genuinely closed, the king is safe, and the recapture structure opens a file that Black can use. |
| PIECE JOB                   | The e7-knight, g7-bishop, queen, and f-rook must support the break; the d7-knight often guards e5 and f6.                            |
| TACTICAL WARNING            | Before ...f5, calculate exf5, e5, and any opening of the center that would expose Black's king.                                      |
| TRADE FILTER                | Preserve attacking pieces in a closed center; exchange White's key defender when it creates an entry square or a usable file.        |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                          |
| CLOCK RULE                  | Do not calculate a whole pawn storm at once. Verify the next contact and compare each side's forcing moves.                          |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: A locked center gives permission for wing play; the supporting pieces decide whether the attack is real.

# 11. Choosing ...e5 or ...d5 - Stage 1

## HIPPO CENTRAL BREAKS

### READ THE POSITION

Black has played ...e5 while White can still choose tension, exchange, or d5.

### PRIMARY PLAN

Choose the break that activates more pieces and leaves White fewer useful ways to keep the space advantage.

### OPPONENT'S COUNTERPLAY

White wants to close on favorable terms, maintain a protected space wedge, or open the center while Black's pieces remain passive.

### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 e5

### MEMORY RULE

The correct central break is the moment Black cashes in the Hippo's flexibility.

# 11. Decision Framework

## Choosing ...e5 or ...d5 - Stage 1

|                             |                                                                                                                                                 |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 when the resulting d5 closure is manageable; use ...d5 when Black can meet the captures and exploit open central files.               |
| PIECE JOB                   | The b7-bishop, d7-knight, queen, and central pawns must agree on the break; a break unsupported by pieces only trades one weakness for another. |
| TACTICAL WARNING            | Calculate all central captures before pushing. A single zwischenzug or pin can turn a freeing break into a lost pawn.                           |
| TRADE FILTER                | Central exchanges are good when they free Black's pieces, even if they reduce the romantic mystery of the Hippo.                                |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                     |
| CLOCK RULE                  | Spend real time on ...e5 and ...d5 because they irreversibly choose the structure; do not spend it on routine shell moves.                      |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The correct central break is the moment Black cashes in the Hippo's flexibility.

## 12. Choosing ...e5 or ...d5 - Stage 2

### HIPPO CENTRAL BREAKS

#### READ THE POSITION

White has closed with d5, fixing an e5-d6 chain and defining future wing play.

#### PRIMARY PLAN

Choose the break that activates more pieces and leaves White fewer useful ways to keep the space advantage.

#### OPPONENT'S COUNTERPLAY

White wants to close on favorable terms, maintain a protected space wedge, or open the center while Black's pieces remain passive.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 e5 11. d5

#### MEMORY RULE

The correct central break is the moment Black cashes in the Hippo's flexibility.

## 12. Decision Framework

### Choosing ...e5 or ...d5 - Stage 2

|                             |                                                                                                                                                 |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 when the resulting d5 closure is manageable; use ...d5 when Black can meet the captures and exploit open central files.               |
| PIECE JOB                   | The b7-bishop, d7-knight, queen, and central pawns must agree on the break; a break unsupported by pieces only trades one weakness for another. |
| TACTICAL WARNING            | Calculate all central captures before pushing. A single zwischenzug or pin can turn a freeing break into a lost pawn.                           |
| TRADE FILTER                | Central exchanges are good when they free Black's pieces, even if they reduce the romantic mystery of the Hippo.                                |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                     |
| CLOCK RULE                  | Spend real time on ...e5 and ...d5 because they irreversibly choose the structure; do not spend it on routine shell moves.                      |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The correct central break is the moment Black cashes in the Hippo's flexibility.

## 13. Choosing ...e5 or ...d5 - Stage 3

### HIPPO CENTRAL BREAKS

#### READ THE POSITION

The direct ...d5 break challenges e4 before White begins a slow attack.

#### PRIMARY PLAN

Choose the break that activates more pieces and leaves White fewer useful ways to keep the space advantage.

#### OPPONENT'S COUNTERPLAY

White wants to close on favorable terms, maintain a protected space wedge, or open the center while Black's pieces remain passive.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 d5

#### MEMORY RULE

The correct central break is the moment Black cashes in the Hippo's flexibility.

# 13. Decision Framework

## Choosing ...e5 or ...d5 - Stage 3

|                             |                                                                                                                                                 |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 when the resulting d5 closure is manageable; use ...d5 when Black can meet the captures and exploit open central files.               |
| PIECE JOB                   | The b7-bishop, d7-knight, queen, and central pawns must agree on the break; a break unsupported by pieces only trades one weakness for another. |
| TACTICAL WARNING            | Calculate all central captures before pushing. A single zwischenzug or pin can turn a freeing break into a lost pawn.                           |
| TRADE FILTER                | Central exchanges are good when they free Black's pieces, even if they reduce the romantic mystery of the Hippo.                                |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                     |
| CLOCK RULE                  | Spend real time on ...e5 and ...d5 because they irreversibly choose the structure; do not spend it on routine shell moves.                      |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The correct central break is the moment Black cashes in the Hippo's flexibility.

## 14. Choosing ...e5 or ...d5 - Stage 4

### HIPPO CENTRAL BREAKS

#### READ THE POSITION

Central exchanges have opened the e-file and given Black active piece squares instead of a cramped shell.

#### PRIMARY PLAN

Choose the break that activates more pieces and leaves White fewer useful ways to keep the space advantage.

#### OPPONENT'S COUNTERPLAY

White wants to close on favorable terms, maintain a protected space wedge, or open the center while Black's pieces remain passive.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 d5 11. exd5 exd5

#### MEMORY RULE

The correct central break is the moment Black cashes in the Hippo's flexibility.

# 14. Decision Framework

## Choosing ...e5 or ...d5 - Stage 4

|                             |                                                                                                                                                 |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 when the resulting d5 closure is manageable; use ...d5 when Black can meet the captures and exploit open central files.               |
| PIECE JOB                   | The b7-bishop, d7-knight, queen, and central pawns must agree on the break; a break unsupported by pieces only trades one weakness for another. |
| TACTICAL WARNING            | Calculate all central captures before pushing. A single zwischenzug or pin can turn a freeing break into a lost pawn.                           |
| TRADE FILTER                | Central exchanges are good when they free Black's pieces, even if they reduce the romantic mystery of the Hippo.                                |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                     |
| CLOCK RULE                  | Spend real time on ...e5 and ...d5 because they irreversibly choose the structure; do not spend it on routine shell moves.                      |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The correct central break is the moment Black cashes in the Hippo's flexibility.

## 15. Choosing ...e5 or ...d5 - Stage 5

### HIPPO CENTRAL BREAKS

#### READ THE POSITION

White has answered ...d5 with e5, and Black immediately attacks d4 with ...c5.

#### PRIMARY PLAN

Choose the break that activates more pieces and leaves White fewer useful ways to keep the space advantage.

#### OPPONENT'S COUNTERPLAY

White wants to close on favorable terms, maintain a protected space wedge, or open the center while Black's pieces remain passive.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 d5 11. e5 c5

#### MEMORY RULE

The correct central break is the moment Black cashes in the Hippo's flexibility.

# 15. Decision Framework

## Choosing ...e5 or ...d5 - Stage 5

|                             |                                                                                                                                                 |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 when the resulting d5 closure is manageable; use ...d5 when Black can meet the captures and exploit open central files.               |
| PIECE JOB                   | The b7-bishop, d7-knight, queen, and central pawns must agree on the break; a break unsupported by pieces only trades one weakness for another. |
| TACTICAL WARNING            | Calculate all central captures before pushing. A single zwischenzug or pin can turn a freeing break into a lost pawn.                           |
| TRADE FILTER                | Central exchanges are good when they free Black's pieces, even if they reduce the romantic mystery of the Hippo.                                |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                     |
| CLOCK RULE                  | Spend real time on ...e5 and ...d5 because they irreversibly choose the structure; do not spend it on routine shell moves.                      |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The correct central break is the moment Black cashes in the Hippo's flexibility.

## 16. Queenside Breaks with ...c5 and ...b5 - Stage 1

### HIPPO QUEENSIDE PLAY

#### READ THE POSITION

The ...c5 break attacks d4 and asks whether White's center can remain broad.

#### PRIMARY PLAN

Open or fix queenside files, force White to spend tempi near the king, and coordinate the b7-bishop with the pawn advance.

#### OPPONENT'S COUNTERPLAY

White wants to close the queenside, attack first on the kingside, or use the center before Black's rook files appear.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 c5

#### MEMORY RULE

Against long castling, queenside play is often defense by counterattack-but only forcing counterplay counts.

# 16. Decision Framework

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...c5 when d4 is the target; play ...b5 when the queenside king or space gain justifies the pawn commitment.                         |
| PIECE JOB                   | The b7-bishop, a- and b-pawns, queen, and a8-rook form one operation; the d7-knight may move to clear lines or support c5.                |
| TACTICAL WARNING            | Check sacrifices on b5, e6, and h6, and compare whose breakthrough arrives with check.                                                    |
| TRADE FILTER                | Trade queens when Black's queenside activity leaves a sound ending; keep queens when the open files create real threats against the king. |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                               |
| CLOCK RULE                  | In opposite-side attacks, count checks, captures, and file-opening moves instead of measuring territory.                                  |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Against long castling, queenside play is often defense by counterattack-but only forcing counterplay counts.

## 17. Queenside Breaks with ...c5 and ...b5 - Stage 2

### HIPPO QUEENSIDE PLAY

#### READ THE POSITION

White has closed d5 and Black has fixed the center with ...e5, making flank play more concrete.

#### PRIMARY PLAN

Open or fix queenside files, force White to spend tempi near the king, and coordinate the b7-bishop with the pawn advance.

#### OPPONENT'S COUNTERPLAY

White wants to close the queenside, attack first on the kingside, or use the center before Black's rook files appear.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e5 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 c5 11. d5 e5

#### MEMORY RULE

Against long castling, queenside play is often defense by counterattack-but only forcing counterplay counts.

## Queenside Breaks with ...c5 and ...b5 - Stage 2

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...c5 when d4 is the target; play ...b5 when the queenside king or space gain justifies the pawn commitment.                         |
| PIECE JOB                   | The b7-bishop, a- and b-pawns, queen, and a8-rook form one operation; the d7-knight may move to clear lines or support c5.                |
| TACTICAL WARNING            | Check sacrifices on b5, e6, and h6, and compare whose breakthrough arrives with check.                                                    |
| TRADE FILTER                | Trade queens when Black's queenside activity leaves a sound ending; keep queens when the open files create real threats against the king. |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                               |
| CLOCK RULE                  | In opposite-side attacks, count checks, captures, and file-opening moves instead of measuring territory.                                  |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Against long castling, queenside play is often defense by counterattack-but only forcing counterplay counts.

## 18. Queenside Breaks with ...c5 and ...b5 - Stage 3

### HIPPO QUEENSIDE PLAY

#### READ THE POSITION

White's h-pawn has reached h5, and ...h6 forces White to define the kingside tension before Black commits the king.

#### PRIMARY PLAN

Open or fix queenside files, force White to spend tempi near the king, and coordinate the b7-bishop with the pawn advance.

#### OPPONENT'S COUNTERPLAY

White wants to close the queenside, attack first on the kingside, or use the center before Black's rook files appear.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 e6 5. Qd2 Ne7 6. O-O-O Nd7 7. f3 b6 8. h4 Bb7 9. h5 h6

#### MEMORY RULE

Against long castling, queenside play is often defense by counterattack-but only forcing counterplay counts.

# 18. Decision Framework

## Queenside Breaks with ...c5 and ...b5 - Stage 3

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Against long castling, queenside play is often defense by counterattack-but only forcing counterplay counts.

## 20. Queenside Breaks with ...c5 and ...b5 - Stage 5

### HIPPO QUEENSIDE PLAY

#### READ THE POSITION

Black's ...b5 attacks the wing containing White's king instead of defending passively on the kingside.

#### PRIMARY PLAN

Open or fix queenside files, force White to spend tempi near the king, and coordinate the b7-bishop with the pawn advance.

#### OPPONENT'S COUNTERPLAY

White wants to close the queenside, attack first on the kingside, or use the center before Black's rook files appear.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 e6 5. Qd2 Ne7 6. O-O-O Nd7 7. f3 b6 8. h4 Bb7 9. h5 h6 10. hxg6 Nxg6 11. g4 a6 12. Kb1 b5

#### MEMORY RULE

Against long castling, queenside play is often defense by counterattack-but only forcing counterplay counts.

## 20. Decision Framework

### Queenside Breaks with ...c5 and ...b5 - Stage 5

|                             |                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...c5 when d4 is the target; play ...b5 when the queenside king or space gain justifies the pawn commitment.                         |
| PIECE JOB                   | The b7-bishop, a- and b-pawns, queen, and a8-rook form one operation; the d7-knight may move to clear lines or support c5.                |
| TACTICAL WARNING            | Check sacrifices on b5, e6, and h6, and compare whose breakthrough arrives with check.                                                    |
| TRADE FILTER                | Trade queens when Black's queenside activity leaves a sound ending; keep queens when the open files create real threats against the king. |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                               |
| CLOCK RULE                  | In opposite-side attacks, count checks, captures, and file-opening moves instead of measuring territory.                                  |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Against long castling, queenside play is often defense by counterattack-but only forcing counterplay counts.

## 21. The ...f5 Break - Stage 1

### HIPPO KING-SIDE PLAY

#### READ THE POSITION

The center is closed and Black can consider a kingside break without immediately opening the king in the middle.

#### PRIMARY PLAN

Prepare ...f5 with pieces, choose the correct recapture, and use the opened file before White reorganizes.

#### OPPONENT'S COUNTERPLAY

White may capture, play g4, block with f3, or counter on the queenside before Black's attack becomes forcing.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 a6 11. d5 e5

#### MEMORY RULE

The ...f5 break is a file-opening operation, not a signal to push every kingside pawn.

## 21. Decision Framework

### The ...f5 Break - Stage 1

|                             |                                                                                                                                 |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...f5 only when the center cannot open favorably for White and Black's pieces can use the resulting files and squares.     |
| PIECE JOB                   | The f-rook, queen, g7-bishop, and e7-knight need routes into the attack; pawns alone do not mate.                               |
| TACTICAL WARNING            | Calculate exf5, g4, and central counterbreaks before committing, especially when the g-file might open toward Black's own king. |
| TRADE FILTER                | Trade a defender when it creates an entry square; avoid trading every active piece into an ending with weak dark squares.       |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                     |
| CLOCK RULE                  | At ...f5, calculate the capture structures and one move beyond the recapture; ignore decorative attacking moves.                |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The ...f5 break is a file-opening operation, not a signal to push every kingside pawn.

## 22. The ...f5 Break - Stage 2

### HIPPO KING-SIDE PLAY

#### READ THE POSITION

The f3-knight has stepped away, and Black must decide whether the closed center already permits immediate ...f5.

#### PRIMARY PLAN

Prepare ...f5 with pieces, choose the correct recapture, and use the opened file before White reorganizes.

#### OPPONENT'S COUNTERPLAY

White may capture, play g4, block with f3, or counter on the queenside before Black's attack becomes forcing.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 a6 11. d5 e5 12. Nh2

#### MEMORY RULE

The ...f5 break is a file-opening operation, not a signal to push every kingside pawn.

## 22. Decision Framework

### The ...f5 Break - Stage 2

|                             |                                                                                                                                 |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...f5 only when the center cannot open favorably for White and Black's pieces can use the resulting files and squares.     |
| PIECE JOB                   | The f-rook, queen, g7-bishop, and e7-knight need routes into the attack; pawns alone do not mate.                               |
| TACTICAL WARNING            | Calculate exf5, g4, and central counterbreaks before committing, especially when the g-file might open toward Black's own king. |

4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The ...f5 break is a file-opening operation, not a signal to push every kingside pawn.

## 24. The ...f5 Break - Stage 4

### HIPPO KING-SIDE PLAY

#### READ THE POSITION

The g-pawn recapture has opened the g-file and placed a pawn on f5 that may support further space.

#### PRIMARY PLAN

Prepare ...f5 with pieces, choose the correct recapture, and use the opened file before White reorganizes.

#### OPPONENT'S COUNTERPLAY

White may capture, play g4, block with f3, or counter on the queenside before Black's attack becomes forcing.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 a6 11. d5 e5 12. Nh2 f5 13. exf5 gxf5

#### MEMORY RULE

The ...f5 break is a file-opening operation, not a signal to push every kingside pawn.

## 24. Decision Framework

### The ...f5 Break - Stage 4

|                             |                                                                                                                                 |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...f5 only when the center cannot open favorably for White and Black's pieces can use the resulting files and squares.     |
| PIECE JOB                   | The f-rook, queen, g7-bishop, and e7-knight need routes into the attack; pawns alone do not mate.                               |
| TACTICAL WARNING            | Calculate exf5, g4, and central counterbreaks before committing, especially when the g-file might open toward Black's own king. |
| TRADE FILTER                | Trade a defender when it creates an entry square; avoid trading every active piece into an ending with weak dark squares.       |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                     |
| CLOCK RULE                  | At ...f5, calculate the capture structures and one move beyond the recapture; ignore decorative attacking moves.                |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The ...f5 break is a file-opening operation, not a signal to push every kingside pawn.

## 25. The ...f5 Break - Stage 5

### HIPPO KING-SIDE PLAY

#### READ THE POSITION

Black has advanced to f4, gaining space but also fixing a target that must be supported by pieces.

#### PRIMARY PLAN

Prepare ...f5 with pieces, choose the correct recapture, and use the opened file before White reorganizes.

#### OPPONENT'S COUNTERPLAY

White may capture, play g4, block with f3, or counter on the queenside before Black's attack becomes forcing.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 a6 11. d5 e5 12. Nh2 f5 13. g4 f4

#### MEMORY RULE

The ...f5 break is a file-opening operation, not a signal to push every kingside pawn.

## 25. Decision Framework

### The ...f5 Break - Stage 5

|                             |                                                                                                                                 |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...f5 only when the center cannot open favorably for White and Black's pieces can use the resulting files and squares.     |
| PIECE JOB                   | The f-rook, queen, g7-bishop, and e7-knight need routes into the attack; pawns alone do not mate.                               |
| TACTICAL WARNING            | Calculate exf5, g4, and central counterbreaks before committing, especially when the g-file might open toward Black's own king. |
| TRADE FILTER                | Trade a defender when it creates an entry square; avoid trading every active piece into an ending with weak dark squares.       |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                     |
| CLOCK RULE                  | At ...f5, calculate the capture structures and one move beyond the recapture; ignore decorative attacking moves.                |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The ...f5 break is a file-opening operation, not a signal to push every kingside pawn.

## 26. Meeting White's f-Pawn Expansion - Stage 1

### HIPPO VS F4

#### READ THE POSITION

White has claimed extra kingside and central space with f4 before completing development.

#### PRIMARY PLAN

Challenge the center before White completes an effortless attack, and decide in advance how to meet f5.

#### OPPONENT'S COUNTERPLAY

White wants f5, e5, Qe1-h4, or a pawn storm supported by active bishops and a safe king.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. f4 e6

#### MEMORY RULE

Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 26. Decision Framework

### Meeting White's f-Pawn Expansion - Stage 1

|                             |                                                                                                                                         |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Meet f5 with ...exf5, ...gxf5, or a central counterstrike only after comparing the opened files and which side benefits from exchanges. |
| PIECE JOB                   | The b7-bishop targets e4, the d7-knight supports central defense, and the queen must be ready for checks on exposed diagonals.          |
| TACTICAL WARNING            | Watch e5 forks, f5 sacrifices, and queen-bishop batteries against the king before playing a slow waiting move.                          |
| TRADE FILTER                | Piece exchanges often help Black if they reduce White's attacking mass without conceding a permanent space bind.                        |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                             |
| CLOCK RULE                  | When White can play f5 immediately, calculate it now; do not analyze unrelated Hippo maneuvers.                                         |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 27. Meeting White's f-Pawn Expansion - Stage 2

### HIPPO VS F4

#### READ THE POSITION

Both sides develop behind the tension while White retains the threat of f5 or e5.

#### PRIMARY PLAN

Challenge the center before White completes an effortless attack, and decide in advance how to meet f5.

#### OPPONENT'S COUNTERPLAY

White wants f5, e5, Qe1-h4, or a pawn storm supported by active bishops and a safe king.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. f4 e6 5. Nf3 Ne7 6. Bd3 b6

#### MEMORY RULE

Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 27. Decision Framework

### Meeting White's f-Pawn Expansion - Stage 2

|                             |                                                                                                                                         |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Meet f5 with ...exf5, ...gxf5, or a central counterstrike only after comparing the opened files and which side benefits from exchanges. |
| PIECE JOB                   | The b7-bishop targets e4, the d7-knight supports central defense, and the queen must be ready for checks on exposed diagonals.          |
| TACTICAL WARNING            | Watch e5 forks, f5 sacrifices, and queen-bishop batteries against the king before playing a slow waiting move.                          |
| TRADE FILTER                | Piece exchanges often help Black if they reduce White's attacking mass without conceding a permanent space bind.                        |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                             |
| CLOCK RULE                  | When White can play f5 immediately, calculate it now; do not analyze unrelated Hippo maneuvers.                                         |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 28. Meeting White's f-Pawn Expansion - Stage 3

### HIPPO VS F4

#### READ THE POSITION

White's pieces now support a direct f5 advance, so Black's quiet shell must become concrete.

#### PRIMARY PLAN

Challenge the center before White completes an effortless attack, and decide in advance how to meet f5.

#### OPPONENT'S COUNTERPLAY

White wants f5, e5, Qe1-h4, or a pawn storm supported by active bishops and a safe king.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. f4 e6 5. Nf3 Ne7 6. Bd3 b6 7. O-O Bb7 8. Be3 Nd7 9. Qd2

#### MEMORY RULE

Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 28. Decision Framework

### Meeting White's f-Pawn Expansion - Stage 3

|                             |                                                                                                                                         |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Meet f5 with ...exf5, ...gxf5, or a central counterstrike only after comparing the opened files and which side benefits from exchanges. |
| PIECE JOB                   | The b7-bishop targets e4, the d7-knight supports central defense, and the queen must be ready for checks on exposed diagonals.          |
| TACTICAL WARNING            | Watch e5 forks, f5 sacrifices, and queen-bishop batteries against the king before playing a slow waiting move.                          |
| TRADE FILTER                | Piece exchanges often help Black if they reduce White's attacking mass without conceding a permanent space bind.                        |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                             |

5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 29. Meeting White's f-Pawn Expansion - Stage 4

### HIPPO VS F4

#### READ THE POSITION

The position has reached maximum tension before White's thematic f5 break.

#### PRIMARY PLAN

Challenge the center before White completes an effortless attack, and decide in advance how to meet f5.

#### OPPONENT'S COUNTERPLAY

White wants f5, e5, Qe1-h4, or a pawn storm supported by active bishops and a safe king.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. f4 e6 5. Nf3 Ne7 6. Bd3 b6 7. O-O Bb7 8. Be3 Nd7 9. Qd2 a6 10. Rae1 h6

#### MEMORY RULE

Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 29. Decision Framework

### Meeting White's f-Pawn Expansion - Stage 4

|                             |                                                                                                                                         |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Meet f5 with ...exf5, ...gxf5, or a central counterstrike only after comparing the opened files and which side benefits from exchanges. |
| PIECE JOB                   | The b7-bishop targets e4, the d7-knight supports central defense, and the queen must be ready for checks on exposed diagonals.          |
| TACTICAL WARNING            | Watch e5 forks, f5 sacrifices, and queen-bishop batteries against the king before playing a slow waiting move.                          |
| TRADE FILTER                | Piece exchanges often help Black if they reduce White's attacking mass without conceding a permanent space bind.                        |

| CLOCK RULE                  | When White can play f5 immediately, calculate it now; do not analyze unrelated Hippo maneuvers.                                         |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 30. Meeting White's f-Pawn Expansion - Stage 5

### HIPPO VS F4

#### READ THE POSITION

Black has exchanged the f5 spearhead and used the g-pawn to recapture, changing files and dark-square control.

#### PRIMARY PLAN

Challenge the center before White completes an effortless attack, and decide in advance how to meet f5.

#### OPPONENT'S COUNTERPLAY

White wants f5, e5, Qe1-h4, or a pawn storm supported by active bishops and a safe king.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. f4 e6 5. Nf3 Ne7 6. Bd3 b6 7. O-O Bb7 8. Be3 Nd7 9. Qd2 a6 10. Rae1 h6 11. f5 exf5 12. exf5 gxf5

#### MEMORY RULE

Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 30. Decision Framework

### Meeting White's f-Pawn Expansion - Stage 5

|                             |                                                                                                                                         |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Meet f5 with ...exf5, ...gxf5, or a central counterstrike only after comparing the opened files and which side benefits from exchanges. |
| PIECE JOB                   | The b7-bishop targets e4, the d7-knight supports central defense, and the queen must be ready for checks on exposed diagonals.          |
| TACTICAL WARNING            | Watch e5 forks, f5 sacrifices, and queen-bishop batteries against the king before playing a slow waiting move.                          |
| TRADE FILTER                | Piece exchanges often help Black if they reduce White's attacking mass without conceding a permanent space bind.                        |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                             |
| CLOCK RULE                  | When White can play f5 immediately, calculate it now; do not analyze unrelated Hippo maneuvers.                                         |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Against f4, flexibility has an expiration date: act before White's space becomes a supported attack.

## 31. Surviving the h- and g-Pawn Storm - Stage 1

### HIPPO KING SAFETY

### READ THE POSITION

White has castled long and placed the f3 pawn behind a direct kingside expansion.

### PRIMARY PLAN

Create a central threat, make the advanced pawns into targets, and avoid castling into an open file merely by habit.

### OPPONENT'S COUNTERPLAY

White wants h5, hxg6, Bh6, g4-g5, and open files against a predictable kingside king.

### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 e6 5. Qd2 Ne7 6. O-O-O Nd7 7. f3 b6

### MEMORY RULE

The best defense to a wing storm is often a central question White cannot ignore.

# 31. Decision Framework

## Surviving the h- and g-Pawn Storm - Stage 1

|                             |                                                                                                                                                                      |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...d5 or ...e5 to hit the center when White has spent tempi on wing pawns; capture on h5 only when the resulting rook or piece placement gives a concrete tempo. |
| PIECE JOB                   | The king may remain on e8 briefly, the e7-knight can reach g6, and the b7-bishop supports central counterplay against e4.                                            |
| TACTICAL WARNING            | Calculate sacrifices on h6 and g6, queen entry squares, and whether castling would walk into a forcing line.                                                         |
| TRADE FILTER                | Trade queens if it ends the attack and leaves a playable structure; avoid exchanging the one defender that controls the open file.                                   |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                                          |
| CLOCK RULE                  | When pawns contact the king shelter, calculate forcing moves; when they are still far away, improve the center quickly.                                              |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The best defense to a wing storm is often a central question White cannot ignore.

## 32. Surviving the h- and g-Pawn Storm - Stage 2

### HIPPO KING SAFETY

### READ THE POSITION

Black meets h4 with ...h6, forcing White to reveal whether the attack will close or exchange the kingside.

### PRIMARY PLAN

Create a central threat, make the advanced pawns into targets, and avoid castling into an open file merely by habit.

### OPPONENT'S COUNTERPLAY

White wants h5, hxg6, Bh6, g4-g5, and open files against a predictable kingside king.

### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 e6 5. Qd2 Ne7 6. O-O-O Nd7 7. f3 b6 8. h4 h6

### MEMORY RULE

The best defense to a wing storm is often a central question White cannot ignore.

## 32. Decision Framework

### Surviving the h- and g-Pawn Storm - Stage 2

|                             |                                                                                                                                                                      |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...d5 or ...e5 to hit the center when White has spent tempi on wing pawns; capture on h5 only when the resulting rook or piece placement gives a concrete tempo. |
| PIECE JOB                   | The king may remain on e8 briefly, the e7-knight can reach g6, and the b7-bishop supports central counterplay against e4.                                            |
| TACTICAL WARNING            | Calculate sacrifices on h6 and g6, queen entry squares, and whether castling would walk into a forcing line.                                                         |
| TRADE FILTER                | Trade queens if it ends the attack and leaves a playable structure; avoid exchanging the one defender that controls the open file.                                   |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                                          |
| CLOCK RULE                  | When pawns contact the king shelter, calculate forcing moves; when they are still far away, improve the center quickly.                                              |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The best defense to a wing storm is often a central question White cannot ignore.

## 33. Surviving the h- and g-Pawn Storm - Stage 3

### HIPPO KING SAFETY

### READ THE POSITION

After h5, ...g5 closes the file and asks whether White can justify further pawn moves.

### PRIMARY PLAN

Create a central threat, make the advanced pawns into targets, and avoid castling into an open file merely by habit.

### OPPONENT'S COUNTERPLAY

White wants h5, hxg6, Bh6, g4-g5, and open files against a predictable kingside king.

### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 e6 5. Qd2 Ne7 6. O-O-O Nd7 7. f3 b6 8. h4 h6 9. h5 g5

### MEMORY RULE

The best defense to a wing storm is often a central question White cannot ignore.

## 33. Decision Framework

### Surviving the h- and g-Pawn Storm - Stage 3

|                             |                                                                                                                                                                      |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...d5 or ...e5 to hit the center when White has spent tempi on wing pawns; capture on h5 only when the resulting rook or piece placement gives a concrete tempo. |
| PIECE JOB                   | The king may remain on e8 briefly, the e7-knight can reach g6, and the b7-bishop supports central counterplay against e4.                                            |
| TACTICAL WARNING            | Calculate sacrifices on h6 and g6, queen entry squares, and whether castling would walk into a forcing line.                                                         |
| TRADE FILTER                | Trade queens if it ends the attack and leaves a playable structure; avoid exchanging the one defender that controls the open file.                                   |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                                          |
| CLOCK RULE                  | When pawns contact the king shelter, calculate forcing moves; when they are still far away, improve the center quickly.                                              |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The best defense to a wing storm is often a central question White cannot ignore.

## 34. Surviving the h- and g-Pawn Storm - Stage 4

### HIPPO KING SAFETY

### READ THE POSITION

White has played f4 and Black gains space with ...g4, but the advanced chain now requires tactical support.

### PRIMARY PLAN

Create a central threat, make the advanced pawns into targets, and avoid castling into an open file merely by habit.

### OPPONENT'S COUNTERPLAY

White wants h5, hxg6, Bh6, g4-g5, and open files against a predictable kingside king.

### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 e6 5. Qd2 Ne7 6. O-O-O Nd7 7. f3 b6 8. h4 h6 9. h5 g5 10. f4 g4

### MEMORY RULE

The best defense to a wing storm is often a central question White cannot ignore.

## 34. Decision Framework

### Surviving the h- and g-Pawn Storm - Stage 4

|                             |                                                                                                                                                                      |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...d5 or ...e5 to hit the center when White has spent tempi on wing pawns; capture on h5 only when the resulting rook or piece placement gives a concrete tempo. |

2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The best defense to a wing storm is often a central question White cannot ignore.

## 35. Surviving the h- and g-Pawn Storm - Stage 5

### HIPPO KING SAFETY

### READ THE POSITION

Black strikes with ...d5 after White spends another tempo developing behind the pawn storm.

### PRIMARY PLAN

Create a central threat, make the advanced pawns into targets, and avoid castling into an open file merely by habit.

### OPPONENT'S COUNTERPLAY

White wants h5, hxg6, Bh6, g4-g5, and open files against a predictable kingside king.

### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 e6 5. Qd2 Ne7 6. O-O-O Nd7 7. f3 b6 8. h4 h6 9. h5 g5 10. f4 g4 11. Nge2 d5

### MEMORY RULE

The best defense to a wing storm is often a central question White cannot ignore.

## 35. Decision Framework

### Surviving the h- and g-Pawn Storm - Stage 5

|                             |                                                                                                                                                                      |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...d5 or ...e5 to hit the center when White has spent tempi on wing pawns; capture on h5 only when the resulting rook or piece placement gives a concrete tempo. |
| PIECE JOB                   | The king may remain on e8 briefly, the e7-knight can reach g6, and the b7-bishop supports central counterplay against e4.                                            |
| TACTICAL WARNING            | Calculate sacrifices on h6 and g6, queen entry squares, and whether castling would walk into a forcing line.                                                         |
| TRADE FILTER                | Trade queens if it ends the attack and leaves a playable structure; avoid exchanging the one defender that controls the open file.                                   |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                                                          |
| CLOCK RULE                  | When pawns contact the king shelter, calculate forcing moves; when they are still far away, improve the center quickly.                                              |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The best defense to a wing storm is often a central question White cannot ignore.

## 36. Against 1.d4 and 1.c4 Centers - Stage 1

### HIPPO VS QUEEN PAWNS

#### READ THE POSITION

White has claimed d4 and c4 while Black begins from the same flexible fianchetto idea.

#### PRIMARY PLAN

Challenge the broad center on time and accept that the game may transpose into King's Indian, Modern, or Benoni-like structures.

#### OPPONENT'S COUNTERPLAY

White wants d5, queenside expansion, and piece activity behind the extra space before Black finds a break.

#### REFERENCE LINE

1. d4 g6 2. c4 Bg7 3. Nc3 d6

#### MEMORY RULE

The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 36. Decision Framework

Against 1.d4 and 1.c4 Centers - Stage 1

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 to invite a closed center or ...c5 to attack d4; do not insist on every Hippo move while White builds four ranks of space. |
| PIECE JOB                   | The b7-bishop targets e4, while the g7-bishop and knights must support the chosen central break.                                     |
| TACTICAL WARNING            | Watch d5 advances that gain tempo, e5 tactics against the f6 or d6 squares, and queenside expansion after the center closes.         |
| TRADE FILTER                | Trade central pawns when the open files free Black's pieces; avoid automatic exchanges that leave White a protected passed pawn.     |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                          |
| CLOCK RULE                  | Against a three-pawn center, calculate the break now. Slow waiting moves are expensive because White already has space.              |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 37. Against 1.d4 and 1.c4 Centers - Stage 2

### HIPPO VS QUEEN PAWNS

#### READ THE POSITION

White owns a three-pawn center and Black has developed without challenging it yet.

#### PRIMARY PLAN

Challenge the broad center on time and accept that the game may transpose into King's Indian, Modern, or Benoni-like structures.

#### OPPONENT'S COUNTERPLAY

White wants d5, queenside expansion, and piece activity behind the extra space before Black finds a break.

**REFERENCE LINE** 1. d4 g6 2. c4 Bg7 3. Nc3 d6 4. e4 e6 5. Nf3 Ne7

#### MEMORY RULE

The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 37. Decision Framework

Against 1.d4 and 1.c4 Centers - Stage 2

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 to invite a closed center or ...c5 to attack d4; do not insist on every Hippo move while White builds four ranks of space. |
| PIECE JOB                   | The b7-bishop targets e4, while the g7-bishop and knights must support the chosen central break.                                     |
| TACTICAL WARNING            | Watch d5 advances that gain tempo, e5 tactics against the f6 or d6 squares, and queenside expansion after the center closes.         |
| TRADE FILTER                | Trade central pawns when the open files free Black's pieces; avoid automatic exchanges that leave White a protected passed pawn.     |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                          |
| CLOCK RULE                  | Against a three-pawn center, calculate the break now. Slow waiting moves are expensive because White already has space.              |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 38. Against 1.d4 and 1.c4 Centers - Stage 3

### HIPPO VS QUEEN PAWNS

#### READ THE POSITION

Both bishops oppose the center from long diagonals, but White still has more room.

#### PRIMARY PLAN

Challenge the broad center on time and accept that the game may transpose into King's Indian, Modern, or Benoni-like structures.

#### OPPONENT'S COUNTERPLAY

White wants d5, queenside expansion, and piece activity behind the extra space before Black finds a break.

#### REFERENCE LINE

1. d4 g6 2. c4 Bg7 3. Nc3 d6 4. e4 e6 5. Nf3 Ne7 6. Be2 b6 7. O-O Bb7

#### MEMORY RULE

The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 38. Decision Framework

Against 1.d4 and 1.c4 Centers - Stage 3

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 to invite a closed center or ...c5 to attack d4; do not insist on every Hippo move while White builds four ranks of space. |
| PIECE JOB                   | The b7-bishop targets e4, while the g7-bishop and knights must support the chosen central break.                                     |
| TACTICAL WARNING            | Watch d5 advances that gain tempo, e5 tactics against the f6 or d6 squares, and queenside expansion after the center closes.         |
| TRADE FILTER                | Trade central pawns when the open files free Black's pieces; avoid automatic exchanges that leave White a protected passed pawn.     |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                          |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 39. Against 1.d4 and 1.c4 Centers - Stage 4

### HIPPO VS QUEEN PAWNS

#### READ THE POSITION

Black is fully developed enough to choose a break rather than add more waiting moves.

#### PRIMARY PLAN

Challenge the broad center on time and accept that the game may transpose into King's Indian, Modern, or Benoni-like structures.

#### OPPONENT'S COUNTERPLAY

White wants d5, queenside expansion, and piece activity behind the extra space before Black finds a break.

#### REFERENCE LINE

1. d4 g6 2. c4 Bg7 3. Nc3 d6 4. e4 e6 5. Nf3 Ne7 6. Be2 b6 7. O-O Bb7 8. Re1 Nd7 9. Bf4 O-O

#### MEMORY RULE

The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 39. Decision Framework

Against 1.d4 and 1.c4 Centers - Stage 4

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 to invite a closed center or ...c5 to attack d4; do not insist on every Hippo move while White builds four ranks of space. |
| PIECE JOB                   | The b7-bishop targets e4, while the g7-bishop and knights must support the chosen central break.                                     |
| TACTICAL WARNING            | Watch d5 advances that gain tempo, e5 tactics against the f6 or d6 squares, and queenside expansion after the center closes.         |
| TRADE FILTER                | Trade central pawns when the open files free Black's pieces; avoid automatic exchanges that leave White a protected passed pawn.     |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                          |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 40. Against 1.d4 and 1.c4 Centers - Stage 5

### HIPPO VS QUEEN PAWNS

#### READ THE POSITION

The center has closed with d5 and ...e5, creating a structure closer to a King's Indian than a quiet shell.

#### PRIMARY PLAN

Challenge the broad center on time and accept that the game may transpose into King's Indian, Modern, or Benoni-like structures.

#### OPPONENT'S COUNTERPLAY

White wants d5, queenside expansion, and piece activity behind the extra space before Black finds a break.

#### REFERENCE LINE

1. d4 g6 2. c4 Bg7 3. Nc3 d6 4. e4 e5 5. Nf3 Ne7 6. Be2 b6 7. O-O Bb7 8. Re1 Nd7 9. Bf4 O-O 10. d5 e5

#### MEMORY RULE

The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 40. Decision Framework

Against 1.d4 and 1.c4 Centers - Stage 5

|                             |                                                                                                                                      |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Use ...e5 to invite a closed center or ...c5 to attack d4; do not insist on every Hippo move while White builds four ranks of space. |
| PIECE JOB                   | The b7-bishop targets e4, while the g7-bishop and knights must support the chosen central break.                                     |
| TACTICAL WARNING            | Watch d5 advances that gain tempo, e5 tactics against the f6 or d6 squares, and queenside expansion after the center closes.         |
| TRADE FILTER                | Trade central pawns when the open files free Black's pieces; avoid automatic exchanges that leave White a protected passed pawn.     |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                          |
| CLOCK RULE                  | Against a three-pawn center, calculate the break now. Slow waiting moves are expensive because White already has space.              |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The Hippo is a route into a playable structure, not a promise to avoid mainstream central chess.

## 41. When White Refuses a Big Center - Stage 1

### HIPPO ADAPTATION

### READ THE POSITION

White has chosen a quiet Reti shell and left the center available.

### PRIMARY PLAN

Claim useful central space, transpose when favorable, and keep only the Hippo features that serve the actual position.

### OPPONENT'S COUNTERPLAY

White wants a low-risk setup, delayed central expansion, and the chance to make Black waste tempi on irrelevant flank moves.

### REFERENCE LINE

1. Nf3 g6 2. g3 Bg7 3. Bg2 d6 4. O-O e6

### MEMORY RULE

If White refuses the center, take a fair share of it; do not play the Hippo against an imaginary opponent.

# 41. Decision Framework

## When White Refuses a Big Center - Stage 1

|                             |                                                                                                                                        |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...e5, ...d5, or ...c5 when White has not prevented it; flexibility includes taking the center yourself.                          |
| PIECE JOB                   | Develop the knights and bishops toward central influence rather than copying a diagram whose purpose has disappeared.                  |
| TACTICAL WARNING            | Watch sudden d4 or e4 breaks after Black commits to a wing; White's quiet setup can become a center in one move.                       |
| TRADE FILTER                | Exchanges are welcome when Black has equal space and active pieces; there is no need to preserve tension merely to keep a Hippo label. |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                            |
| CLOCK RULE                  | Use normal opening speed until White creates central contact, then calculate the resulting pawn structure.                             |

## ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: If White refuses the center, take a fair share of it; do not play the Hippo against an imaginary opponent.

## 42. When White Refuses a Big Center - Stage 2

### HIPPO ADAPTATION

### READ THE POSITION

White's London development does not justify Black surrendering the whole center without question.

### PRIMARY PLAN

Claim useful central space, transpose when favorable, and keep only the Hippo features that serve the actual position.

### OPPONENT'S COUNTERPLAY

White wants a low-risk setup, delayed central expansion, and the chance to make Black waste tempi on irrelevant flank moves.

### REFERENCE LINE

1. d4 g6 2. Bf4 Bg7 3. e3 d6 4. Nf3 Nd7

### MEMORY RULE

If White refuses the center, take a fair share of it; do not play the Hippo against an imaginary opponent.

## 42. Decision Framework

### When White Refuses a Big Center - Stage 2

|                             |                                                                                                                                        |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...e5, ...d5, or ...c5 when White has not prevented it; flexibility includes taking the center yourself.                          |
| PIECE JOB                   | Develop the knights and bishops toward central influence rather than copying a diagram whose purpose has disappeared.                  |
| TACTICAL WARNING            | Watch sudden d4 or e4 breaks after Black commits to a wing; White's quiet setup can become a center in one move.                       |
| TRADE FILTER                | Exchanges are welcome when Black has equal space and active pieces; there is no need to preserve tension merely to keep a Hippo label. |
| ENDGAME FORECAST            | Forecast which structure, majority, target, or superior piece remains after simplification.                                            |
| CLOCK RULE                  | Use normal opening speed until White creates central contact, then calculate the resulting pawn structure.                             |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: If White refuses the center, take a fair share of it; do not play the Hippo against an imaginary opponent.

## 43. When White Refuses a Big Center - Stage 3

### HIPPO ADAPTATION

### READ THE POSITION

The English move order creates queenside influence without an immediate e4-d4 pawn duo.

### PRIMARY PLAN

Claim useful central space, transpose when favorable, and keep only the Hippo features that serve the actual position.

### OPPONENT'S COUNTERPLAY

White wants a low-risk setup, delayed central expansion, and the chance to make Black waste tempi on irrelevant flank moves.

### REFERENCE LINE

1. c4 g6 2. Nc3 Bg7 3. g3 d6 4. Bg2 e6

### MEMORY RULE

If White refuses the center, take a fair share of it; do not play the Hippo against an imaginary opponent.

## 43. Decision Framework

### When White Refuses a Big Center - Stage 3

|                             |                                                                                                                                        |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | Play ...e5, ...d5, or ...c5 when White has not prevented it; flexibility includes taking the center yourself.                          |
| PIECE JOB                   | Develop the knights and bishops toward central influence rather than copying a diagram whose purpose has disappeared.                  |
| TACTICAL WARNING            | Watch sudden d4 or e4 breaks after Black commits to a wing; White's quiet setup can become a center in one move.                       |

4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: If White refuses the center, take a fair share of it; do not play the Hippo against an imaginary opponent.

## 46. Tactics, Exchanges, and Transformation - Stage 1

### HIPPO PRACTICAL PLAY

#### READ THE POSITION

White has exchanged the dark bishops and forced Black's king to recapture on g7, changing the usual attacking geometry.

#### PRIMARY PLAN

Re-evaluate the position after every transformation and play the resulting structure instead of trying to rebuild the shell.

#### OPPONENT'S COUNTERPLAY

White wants to exploit open files immediately, trade Black's active defenders, or carry a space advantage into an ending.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 e6 5. Qd2 Ne7 6. O-O-O Nd7 7. Bh6 O-O 8. Bxg7 Kxg7

#### MEMORY RULE

The strongest Hippo players know when the Hippo has ended and ordinary chess has begun.

## 46. Decision Framework

### Tactics, Exchanges, and Transformation - Stage 1

|                                |                                                                                                                                                  |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK /<br>TRANSFORMATION | A break is successful when the resulting position activates Black's pieces; the pawn move itself is not the achievement.                         |
| PIECE JOB                      | After exchanges, place rooks on open files, activate the queen and knights, and give the bishops new jobs if their original diagonals disappear. |
| TACTICAL WARNING               | Check pins on the e-file, sacrifices on e6 or h6, and tactical shots against an uncastled or displaced king after every pawn capture.            |
| TRADE FILTER                   | Trade queens when king safety or cramped space is the main problem; keep them when Black's active files create the stronger threats.             |
| ENDGAME FORECAST               | Forecast which structure, majority, target, or superior piece remains after simplification.                                                      |
| CLOCK RULE                     | At every capture, calculate the forced recaptures and then stop to reassess; do not continue the old plan automatically.                         |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The strongest Hippo players know when the Hippo has ended and ordinary chess has begun.

## 47. Tactics, Exchanges, and Transformation - Stage 2

### HIPPO PRACTICAL PLAY

#### READ THE POSITION

The ...d5 break has produced an open e-file and a position that must be judged as ordinary central chess.

#### PRIMARY PLAN

Re-evaluate the position after every transformation and play the resulting structure instead of trying to rebuild the shell.

#### OPPONENT'S COUNTERPLAY

White wants to exploit open files immediately, trade Black's active defenders, or carry a space advantage into an ending.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 d5 11. exd5 exd5

#### MEMORY RULE

The strongest Hippo players know when the Hippo has ended and ordinary chess has begun.

## 47. Decision Framework

### Tactics, Exchanges, and Transformation - Stage 2

## 48. Decision Framework

### Tactics, Exchanges, and Transformation - Stage 3

|                                |                                                                                                                                                  |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK /<br>TRANSFORMATION | A break is successful when the resulting position activates Black's pieces; the pawn move itself is not the achievement.                         |
| PIECE JOB                      | After exchanges, place rooks on open files, activate the queen and knights, and give the bishops new jobs if their original diagonals disappear. |
| TACTICAL WARNING               | Check pins on the e-file, sacrifices on e6 or h6, and tactical shots against an uncastled or displaced king after every pawn capture.            |
| TRADE FILTER                   | Trade queens when king safety or cramped space is the main problem; keep them when Black's active files create the stronger threats.             |
| ENDGAME FORECAST               | Forecast which structure, majority, target, or superior piece remains after simplification.                                                      |
| CLOCK RULE                     | At every capture, calculate the forced recaptures and then stop to reassess; do not continue the old plan automatically.                         |

### ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The strongest Hippo players know when the Hippo has ended and ordinary chess has begun.

## 49. Tactics, Exchanges, and Transformation - Stage 4

### HIPPO PRACTICAL PLAY

#### READ THE POSITION

An early ...f5 has opened the center before it was fully closed, exposing why break timing matters.

#### PRIMARY PLAN

Re-evaluate the position after every transformation and play the resulting structure instead of trying to rebuild the shell.

#### OPPONENT'S COUNTERPLAY

White wants to exploit open files immediately, trade Black's active defenders, or carry a space advantage into an ending.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 f5 11. exf5 exf5

#### MEMORY RULE

The strongest Hippo players know when the Hippo has ended and ordinary chess has begun.

## 49. Decision Framework

### Tactics, Exchanges, and Transformation - Stage 4

|                             |                                                                                                                                                  |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | A break is successful when the resulting position activates Black's pieces; the pawn move itself is not the achievement.                         |
| PIECE JOB                   | After exchanges, place rooks on open files, activate the queen and knights, and give the bishops new jobs if their original diagonals disappear. |

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The strongest Hippo players know when the Hippo has ended and ordinary chess has begun.

## 50. Tactics, Exchanges, and Transformation - Stage 5

### HIPPO PRACTICAL PLAY

#### READ THE POSITION

The ...c5 exchange has activated Black's d7-knight and reduced White's central space.

#### PRIMARY PLAN

Re-evaluate the position after every transformation and play the resulting structure instead of trying to rebuild the shell.

#### OPPONENT'S COUNTERPLAY

White wants to exploit open files immediately, trade Black's active defenders, or carry a space advantage into an ending.

#### REFERENCE LINE

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Nf3 e6 5. Bd3 Ne7 6. O-O O-O 7. Re1 b6 8. h3 Bb7 9. Be3 Nd7 10. Qd2 c5 11. dxc5 Nxc5

#### MEMORY RULE

The strongest Hippo players know when the Hippo has ended and ordinary chess has begun.

## 50. Decision Framework

### Tactics, Exchanges, and Transformation - Stage 5

|                             |                                                                                                                                                  |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| PAWN BREAK / TRANSFORMATION | A break is successful when the resulting position activates Black's pieces; the pawn move itself is not the achievement.                         |

#### NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The strongest Hippo players know when the Hippo has ended and ordinary chess has begun.

# Course Completion Test

Choose ten chapters at random. Rebuild each reference position, name both sides' plans, identify the critical break, and state the trade filter without reopening the chapter.

Score one point for the structure, one for your plan, one for counterplay, one for the break, and one for the memory rule. Forty out of fifty means the knowledge is usable; below forty means retrieval practice should continue.

## FINAL PRINCIPLE

A course is complete when its ideas appear in your decisions, not when its pages have been read.
