

COMPLETE CHESS LEARNING LIBRARY

Middlegame Plans and Piece Jobs

Worst-piece repair, restriction, outposts, exchanges, and plan triggers

COURSE BOOK

20 focused chapters - model positions - decision rules - retrieval practice

Designed to change what you notice, calculate, remember, and do at the board.

How to Use This Course

ONE CHAPTER, FOUR PASSES

1. Read the position without moving pieces. 2. State your plan and the opponent's counterplay. 3. Study the decision rules. 4. Close the book and reconstruct the position from memory.

RETRIEVAL SCHEDULE

Review the chapter the next day, one week later, and after a game that reaches a similar structure. Retrieval is more valuable than rereading.

BOARD ROUTINE

Opponent's threat - forcing moves - loose pieces - worst piece - central break - best reply - choose and stop.

The course book explains each model position. The separate workbook forces recall, prediction, and self-scoring. Use the book first, then attempt the matching workbook page without looking back.

Engine evaluations are intentionally not the lesson. The aim is to store human decision rules that remain useful when the exact move order changes.

Course Map

MODULE	CHAPTERS
MIDDLEGAME PLANS AND PIECE JOBS	20

01. Find the Worst Piece

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

The least useful piece often reveals the correct quiet move.

PRIMARY PLAN

Give it two realistic routes and compare which helps the main break.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 Nf6

MEMORY RULE

Improve the piece that cannot join the plan.

01. Decision Framework

Find the Worst Piece

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Improve the piece that cannot join the plan.

02. Knight Routes in d4-c4 Positions

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

Knights often travel through d2-f1-g3, e1-d3, or c3-a4-c5.

PRIMARY PLAN

Choose a route from the outpost and center, not from habit.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4

MEMORY RULE

Name the destination before moving the knight backward.

02. Decision Framework

Knight Routes in d4-c4 Positions

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Name the destination before moving the knight backward.

03. Free the Bad Bishop

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

A bishop trapped by its own pawns needs a pawn break or route outside the chain.

PRIMARY PLAN

Prepare e4, b3-Bb2, or Bd2-c3 according to the structure.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. cxd5 exd5 5. Bg5 Be7 6. e3 O-O 7. Bd3 Nbd7 8. Qc2 Re8 9. Nge2 Nf8 10. O-O

MEMORY RULE

Solve the bishop before launching a wing plan.

03. Decision Framework

Free the Bad Bishop

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Solve the bishop before launching a wing plan.

04. Use the Light Bishop Correctly

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

Bd3, Be2, g2, and c4 serve different structures.

PRIMARY PLAN

Place it where it supports the actual break or target.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 dxc4 3. Nf3 a6 4. e3 b5 5. a4 Bb7 6. axb5 axb5 7. Rxa8 Bxa8

MEMORY RULE

A familiar square is not automatically a useful square.

04. Decision Framework

Use the Light Bishop Correctly

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: A familiar square is not automatically a useful square.

05. Queen Placement as Support

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

The queen supports breaks, recaptures, and entry squares but is vulnerable to tempi.

PRIMARY PLAN

Choose the square that completes development and avoids becoming Black's target.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 dxc4 3. Nf3 c5 4. e3 cxd4 5. exd4 Nf6 6. Bxc4

MEMORY RULE

The queen should support the plan, not lead it.

05. Decision Framework

Queen Placement as Support

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The queen should support the plan, not lead it.

06. Rooks on c, d, and e Files

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

Central transformations decide which rook file matters.

PRIMARY PLAN

Name the penetration square and opponent's contesting rook before occupying the file.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 dxc4 3. e4 e5 4. Nf3 exd4 5. Bxc4 Nc6 6. O-O

MEMORY RULE

An open file without an entry square is only a road.

06. Decision Framework

Rooks on c, d, and e Files

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: An open file without an entry square is only a road.

07. Occupy an Outpost

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

e5, c5, d6, and e6 become outposts when pawns cannot challenge them.

PRIMARY PLAN

Install a piece only after preventing the relevant pawn break or exchange.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. cxd5 exd5 5. Nf3 c6 6. Bg5 Be7 7. Qc2 O-O 8. e3 Nbd7 9. Bd3 Re8 10. O-O

MEMORY RULE

An outpost is secure because pawns cannot chase it.

07. Decision Framework

Occupy an Outpost

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: An outpost is secure because pawns cannot chase it.

08. Use Space Without Overextending

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

Space gives maneuvering room and restricts Black but can create targets.

PRIMARY PLAN

Improve every piece before making a pawn move that cannot return.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. cxd5 exd5 5. Nf3 c6 6. Bg5 Be7 7. Qc2 O-O 8. e3 Nbd7 9. Bd3 Re8 10. O-O

MEMORY RULE

Space is time for pieces, not permission for endless pawn pushes.

08. Decision Framework

Use Space Without Overextending

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Space is time for pieces, not permission for endless pawn pushes.

09. Practical Prophylaxis

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

Black's freeing break is often more important than White's dream move.

PRIMARY PLAN

Ask what Black plays with a free move, then make it harder while improving your position.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. cxd5 exd5 5. Nf3 c6 6. Bg5 Be7 7. Qc2 O-O 8. e3 Nbd7 9. Bd3 Re8 10. O-O

MEMORY RULE

Prevent the freeing move without abandoning your own plan.

09. Decision Framework

Practical Prophylaxis

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Prevent the freeing move without abandoning your own plan.

10. Restriction Before Expansion

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

A queenside or kingside expansion is safer after Black's counterplay is contained.

PRIMARY PLAN

Control the opponent's break, then advance the wing pawns.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Bg5 Be7 5. e3 O-O 6. Nf3 h6 7. Bh4 b6 8. cxd5 exd5 9. Bd3 Bb7 10. O-O Nbd7

MEMORY RULE

Restriction buys the time expansion requires.

10. Decision Framework

Restriction Before Expansion

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Restriction buys the time expansion requires.

11. Queenside Expansion

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

b4-b5, a4-a5, and c5 gain space and create files.

PRIMARY PLAN

Prepare the advance with pieces positioned to use the opened lines.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Nf3 Be7 5. Bf4 O-O 6. e3 c5 7. dxc5 Bxc5 8. Qc2 Nc6 9. Rd1 Qa5 10. a3

MEMORY RULE

Pawn advances are useful when pieces follow them.

11. Decision Framework

Queenside Expansion

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Pawn advances are useful when pieces follow them.

12. Center Versus Wing

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

A wing attack can fail if the center can open against the king.

PRIMARY PLAN

Check every central capture and break before moving a flank pawn.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Nf3 Bb4 5. cxd5 exd5 6. Bg5 h6 7. Bh4 c5 8. e3 Nc6 9. Bd3 cxd4 10. exd4 O-O

MEMORY RULE

The center has priority over the wing.

12. Decision Framework

Center Versus Wing

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The center has priority over the wing.

13. Bishop Pair Decisions

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

The bishop pair grows stronger as the position opens.

PRIMARY PLAN

Preserve it when breaks are coming; trade one bishop when it removes counterplay or wins a structure.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Nf3 dxc4 5. e4 Bb4 6. e5 Nd5 7. Bd2 c5 8. Bxc4 cxd4 9. Nxd5 Bxd2+ 10. Qxd2 exd5

MEMORY RULE

The bishop pair is potential, not a commandment.

13. Decision Framework

Bishop Pair Decisions

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: The bishop pair is potential, not a commandment.

14. Good Bishop, Bad Bishop

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

Judge a bishop by targets and future pawn moves, not only current pawn color.

PRIMARY PLAN

Find the break or exchange that changes the bishop's job.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 e6 3. Nc3 c5 4. e3 Nf6 5. Nf3 Nc6 6. a3 a6 7. dxc5 Bxc5 8. b4 Bd6 9. Bb2 O-O

MEMORY RULE

A bad bishop can become the best piece after one pawn break.

14. Decision Framework

Good Bishop, Bad Bishop

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: A bad bishop can become the best piece after one pawn break.

15. Entry Squares

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

File control matters when a rook or queen can penetrate to the seventh rank or a fixed target.

PRIMARY PLAN

Control the entry square before doubling rooks.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 c6 3. Nf3 Nf6 4. Nc3 dxc4 5. a4 Bf5 6. e3 e6 7. Bxc4 Bb4 8. O-O Nbd7 9. Qe2 Bg6

MEMORY RULE

Fight for the destination, not only the file.

15. Decision Framework

Entry Squares

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Fight for the destination, not only the file.

16. Create a Second Weakness

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

One weakness is often defendable because pieces can cluster around it.

PRIMARY PLAN

Fix the first target, then open play on the opposite wing.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 c6 3. Nf3 Nf6 4. Nc3 a6 5. c5 Bf5 6. Bf4 Nbd7 7. e3 Nh5 8. Bg5 h6 9. Bh4 g5 10. Bg3 Nxg3 11. hxg3 Bg7

MEMORY RULE

Two targets stretch one set of defenders.

16. Decision Framework

Create a Second Weakness

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Two targets stretch one set of defenders.

17. Attack or Convert

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

A temporary initiative demands speed; a lasting structural edge permits improvement.

PRIMARY PLAN

Label the advantage as dynamic or static before choosing the pace.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 c6 3. Nf3 Nf6 4. Nc3 dxc4 5. a4 Bf5 6. e3 e6 7. Bxc4 Bb4 8. O-O Nbd7 9. Qe2 Bg6

MEMORY RULE

Play quickly with temporary assets and patiently with lasting ones.

17. Decision Framework

Attack or Convert

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Play quickly with temporary assets and patiently with lasting ones.

18. Active Defense as White

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

Even with space, White may need to answer a tactical break or king attack.

PRIMARY PLAN

Trade the key attacker, close the line, or create a counterthreat.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 c6 3. Nf3 Nf6 4. Nc3 e6 5. e3 Nbd7 6. Bd3 dxc4 7. Bxc4 b5 8. Bd3 a6 9. e4 c5 10. e5 cxd4 11. Nxb5

MEMORY RULE

Defend the source of the attack, not every symptom.

18. Decision Framework

Active Defense as White

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: Defend the source of the attack, not every symptom.

19. Use the Initiative

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

Activity is valuable while moves arrive with threats and Black lacks coordination.

PRIMARY PLAN

Calculate forcing continuations and stop when the position becomes quiet.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 c6 3. Nf3 Nf6 4. Nc3 e6 5. Bg5 h6 6. Bh4 dxc4 7. e4 g5 8. Bg3 b5 9. Be2 Bb7 10. O-O Nbd7

MEMORY RULE

An initiative expires; convert it into material, structure, or safety.

19. Decision Framework

Use the Initiative

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: An initiative expires; convert it into material, structure, or safety.

20. Recognize the Plan Trigger

MIDDLEGAME PLANS AND PIECE JOBS

READ THE POSITION

Plans change when a pawn captures, a bishop is exchanged, or a break becomes available.

PRIMARY PLAN

After every irreversible move, rediagnose the center and worst piece.

OPPONENT'S COUNTERPLAY

Black's best resource is the freeing move, tactical exchange, or piece improvement that challenges this plan.

REFERENCE LINE

1. d4 d5 2. c4 c6 3. Nf3 Nf6 4. Nc3 e6 5. e3 Nbd7 6. Qc2 Bd6 7. Bd3 O-O 8. O-O dxc4 9. Bxc4 e5

MEMORY RULE

A plan survives only while its structural facts survive.

20. Decision Framework

Recognize the Plan Trigger

PAWN BREAK / TRANSFORMATION	Before an irreversible pawn move, picture the forced recapture, new files, new diagonals, and the first piece to use them.
PIECE JOB	Identify the least active piece and give it a route that supports the structure's main break or target.
TACTICAL WARNING	Verify the plan with checks, captures, threats, loose pieces, pins, and Black's strongest reply.
TRADE FILTER	Exchange only after naming the favorable feature that survives the recapture.
ENDGAME FORECAST	Forecast the king activity, pawn targets, files, majorities, and minor-piece quality that survive simplification.
CLOCK RULE	Spend time on forcing or irreversible choices; move efficiently only in a position you truly recognize.

ACTIVE RECALL

1. Without looking back, describe the center and the position's main imbalance.
2. What is your first useful plan, and which piece must improve before the pawn break?
3. What is the opponent's best freeing move or tactical resource?
4. Which exchange helps, which exchange helps the opponent, and what survives into the ending?
5. State the memory rule in your own words and name one trigger that would change the plan.

NEXT-GAME ASSIGNMENT

If a similar structure appears, pause before the first irreversible decision and use this rule: A plan survives only while its structural facts survive.

Course Completion Test

Choose ten chapters at random. Rebuild each reference position, name both sides' plans, identify the critical break, and state the trade filter without reopening the chapter.

Score one point for the structure, one for your plan, one for counterplay, one for the break, and one for the memory rule. Forty out of fifty means the knowledge is usable; below forty means retrieval practice should continue.

FINAL PRINCIPLE

A course is complete when its ideas appear in your decisions, not when its pages have been read.
