

COMPLETE CHESS LEARNING LIBRARY

The Complete Solid Chess Course

Reliable active play, blunder prevention, defense, and conversion

TRAINING WORKBOOK

30 focused chapters - model positions - decision rules - retrieval practice

Designed to change what you notice, calculate, remember, and do at the board.

Workbook Method

Attempt each page before reopening the matching course-book chapter. Speak answers aloud or write them. The self-score rewards a clear decision rule and the opponent's best reply, not a lucky move guess.

REVIEW THRESHOLD

8-10: review in one week. 5-7: review tomorrow. 0-4: reread the course chapter now, then retry from a blank board.

Use the workbook again after a game reaches a related structure. Real-game retrieval is the final test.

01. Forcing-Move Safety Scan

02 - Blunder Prevention and Calculation

POSITION PROMPT

A quiet Italian position has few immediate tactics, which makes it ideal for building a disciplined scan before every move.

03. Candidate-Move Discipline

02 - Blunder Prevention and Calculation

POSITION PROMPT

The Slav gives both sides several reasonable moves, so choosing candidates by purpose is more reliable than guessing.

Monthly Retention Audit

Select ten random chapters and complete them under a ten-minute total limit. Track the categories you repeatedly miss: threat, candidate, structure, piece job, or forecast.

Do not restart the entire course. Return to the smallest group of chapters that repairs the repeated error, then test again in one week.
